WOLF PLASTICS:
We never lose sight
of our world.

It's about constant further development and about the future and our awareness of it. We operate in terms of best product quality while bearing in mind sustainability. Our research and development is governed by the concept of a successful future and we see service as more than just an item. Best service is paramount and is always part of the deal.

WOLF PLASTICS:
We live out our best service
principle afresh every day.

Service does not start and end here. Service matters more to us. Service for us is something that brings us to be at the cutting edge of technology, it awakens our curiosity and our desire to move forward to ultimately be able to pass on the best quality. We have high expectations of ourselves. For us, service also involves exceeding expectations and fulfilling wishes. Sometimes that is easy and sometimes it isn't. And the best thing about service is, if it is always taken into account. That is how we see it – no other way.

Exemplary: Try it first and then decide

The nicest catalogue cannot come close to the feeling of handling a „real“ sample, and being able to assess the quality and design live in 3D. Send for the sample of your choice here. This gives you a chance to fill, test and evaluate which bucket or canister is the „right“ one for you. Simply scan the QR-Code and order online. Your sample is already on its way to your door.

Only the best for foodstuffs

Most WOLF PLASTICS containers are food safe, which means they combine durability, surface quality and cost-effectiveness with absolute suitability for foodstuffs.

This means, of course, that they have to satisfy a whole raft of legal requirements: e.g. the EU Directive 10/2011, 1935/2004 and 2023-2006.

Grey power for the environment

WOLF PLASTICS leave the choice to you: Every bucket not intended for use in the foodstuffs sector is also available in its grey recycled version. It looks every bit as good as a white bucket because of course a container made from recycle is also IML-capable. So: For a white vest in answer to the climate question just turn to the grey version.

White vests from grey buckets

Our customers are making increasing use of various types of grey container, partly to demonstrate the environmental awareness of their company as well as to upgrade their own climate footprint. WOLF PLASTICS packaging made from regranulate maintains the same high quality criteria in the non-food sector and can be produced in equally attractive designs. So recycling is twice as practical.

The booster for your environmental footprint

If our customers decide to go for recycled „grey“ alternatives instead of „new“ raw materials, the advantages are plain to see.

- same cost plus savings in valuable resources
- equally robust, sustainable and sealable as new plastic
- same design options, also IML-capable
- upgrade of environmental footprint due to massive savings in energy and CO₂.

WOLF PLASTICS:
We live out our best service
principle afresh every day.

Success goes through the stomach

WOLF PLASTICS containers for the food sector are of course tasteless, because their only goal is to keep the contents fresh and to promote themselves through a tasteful appearance. Constantly the customer innovations are offered as needed. And it is often the customer himself who inspires WOLF PLASTICS to innovate. Because with us there is more than on the menu card. Just ask for custom-made items and ask for a taste of our skills.

WOLF PLASTICS:
Improved sustainability –
We give it our all.

Grey power for the environment

WOLF PLASTICS leave the choice to you: Every bucket not intended for use in the foodstuffs sector is also available in its grey recycled version. It looks every bit as good as a white bucket because of course a container made from recycle is also IML-capable. So: For a white vest in answer to the climate question just turn to the grey version.

WOLF PLASTICS:
Improved sustainability –
We give it our all.

We constantly try to ensure that our production process is as sustainable as possible. Water power is the primary energy source in our Austrian factory. Production waste is completely recycled in line with efficiency of resources. One important contribution to climate protection is the replacement of virgin materials (raw materials sourced from fossil resources) with recyclate. This cuts down on greenhouse gas emissions. The potential saving can be as much as 2.2 kilograms of CO₂ per kilogram of recyclate that replaces virgin materials.

WOLF PLASTICS:
 We live out our best service
 principle afresh every day.

Service does not start and end here. Service matters more to us. Service for us is something that brings us to be at the cutting edge of technology, it awakens our curiosity and our desire to move forward to ultimately be able to pass on the best quality. We have high expectations of ourselves. For us, service also involves exceeding expectations and fulfilling wishes. Sometimes that is easy and sometimes it isn't. And the best thing about service is, if it is always taken into account. That is how we see it – no other way.

Improved sustainability –
We give it our all.

The booster for your environmental footprint

If our customers decide to go for recycled „grey“ alternatives instead of „new“ raw materials, the advantages are plain to see.

- same cost plus savings in valuable resources
- equally robust, sustainable and sealable as new plastic
- same design options, also IML-capable
- upgrade of environmental footprint due to massive savings in energy and CO₂.

WOLF PLASTICS:
We never lose sight
of our world.

We can rely on plastics

It is hard these days to imagine life without plastic. In the course of the last hundred years plastics have taken over almost every area of modern existence and this is largely due to the many advantages of this versatile material: as hard as steel but much lighter, as clear as glass but unbreakable - these are but a few of the many talents of plastic.

Plastics can be moulded into any shape and can take on what-ever character is required: Qualities such as hardness, unbreakability, elasticity, temperature-resistance or chemical resistance can be regulated almost limitlessly.

No wonder that those in the construction industry rely heavily on plastic. The black WOLF PLASTICS construction bucket is not only a robust container for construction materials but it can also be used as a long-term piece of equipment on the building site. Up to 25 kg are lifted onto scaffolding several times a day. So this is no single-use product. And even if it was, it could be professionally recycled and be reincarnated into its next life cycle.
