ment make the world a better place

"Shaking nose"

Stirred or shaken

WOLF PLASTICS lids withstand every-
thing. Whether shaken or stirred, with or
with- out closing tab. A special feature
is the DO 1800-00, the so-called „shake-
proof lid“. The shake-proof lid is mainly
used in the construction industry. When
colours are mixed, there are different
types of application: stirring, biaxial mi-
xing or shaking. The hardest require-
ment for the container is shaking, an
up-down movement at certain speed
levels and in different durations. The vi-
brating lid has a sealing lip on the inside,
which adds to the seal and prevents
paint from settling on the edge of the
lid. WOLF PLASTICS has a patent for the
so-called „shaking nose“.

Handle

Metal Handle
with roller grip

Lid

Shake-proof lid

++ | Small buckets are supplied in trays with interlayers.
Size | Tolerance deviation +/- 1 mm possible.
Handle | KB: Plastic handle, MB: Metal Handle.
MBGR: Metal handle with roller grip, MG: Shell grip.
Lid | RD: Shake-proof lid, SD: Sealed lid, UD: Universal lid.
WD: Waterproof lid. Lid overlap approx. + 1 mm.
