WOLF PLASTICS:
Improved sustainability –
We give it our all.

We constantly try to ensure that our production process is as sustainable as possible. Water power is the primary energy source in our Austrian factory. Production waste is completely recycled in line with efficiency of resources. One important contribution to climate protection is the replacement of virgin materials (raw materials sourced from fossil resources) with recyclate. This cuts down on greenhouse gas emissions. The potential saving can be as much as 2.2 kilograms of CO₂ per kilogram of recyclate that replaces virgin materials.
