WOLF PLASTICS:
We never lose sight
of our world.

Robots – Employees of the future?

The first industrial robots were developed in 1951 by Raymond Goertz for nuclear reactor technology. In 1954 George Devol registered a patent in the USA for a programmable manipulator. In 1961 the „Unimate“ robot was first deployed by General Motors on the assembly line. Industrial robots now have multiple areas of application. Automated employees are now used for sticking, folding, loading, assembling, palletting, stacking, measuring and packing. WOLF PLASTICS deploys robots for tasks that free up flesh and blood employees for tasks where they are needed, such as thinking and strategic design.

	VKL 1
Nominal filling volume	1.000 ml
L x B x H	126 x 70 x 182 mm
Weight	65 g
UN approved	—
Stackable	No
Opening	VS30
Packaging unit	1.020 items
